Featured Success Story

Cuyahoga Community College / CWRU Articulation

Tri-C renewed an articulation agreement with Case Western Reserve University (CWRU) which will be valid until 2020. This articulation allows, via dual registration, ten students per semester (Spring and Fall) who are interested in specific STEM majors (Material Science, Mechanical Engineering, Computer Science and Chemical Engineering) and are taking at least two classes at Tri-C concurrently, to each complete up to eight FREE STEM classes at CWRU!

This is a wonderful gift and incentive for those who are working toward a 4-year degree. The continued partnership with CWRU has been rewarding. The material science group at CWRU has been assisting

with research and curriculum planning along with Tri-C's partners Lincoln Electric and with American Welding Society (AWS). Tri-C has been planning further articulations, sharing space, resources and curriculum review to assist with launching new grant affected courses at Tri-C.

Ohio TechNet is designed to transform the way in which higher education works with employers to better align education and training with industry needs for Advanced Manufacturing in Ohio. The goals and strategies of Ohio TechNet are to better identify businesses' most pressing needs, align and accelerate training programs to fill the skills gap, and support transformation of the state's workforce delivery system.

Ohio TechNet launched in 2014 via a $15 million TAACCCT grant made to LCCC on behalf of a statewide consortium of 11 Ohio community colleges including Columbus State, Cincinnati State, Tri-C, Eastern Gateway, Lakeland, LCCC, Owens, Rhodes, Stark State, Sinclair and Zane State.

This workforce product was funded by a grant awarded by the U.S. Department of Labor's Employment and Training Administration. The product was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The U.S. Department of Labor makes guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership.
