

TRAINING OHIO'S WORKFORCE FOR CAREERS IN MANUFACTURING

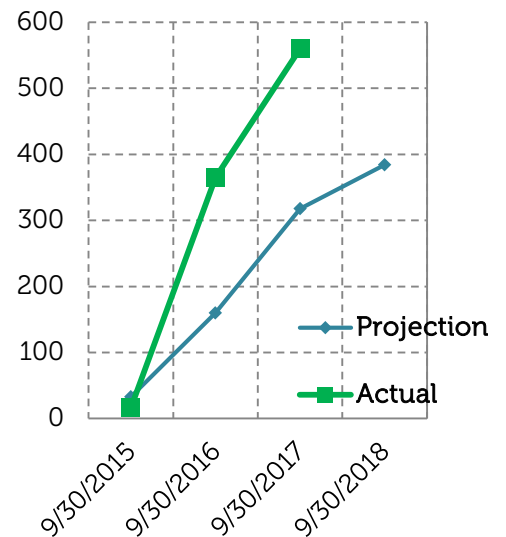

\$15 MILLION INVESTMENT + \$2.8 MILLION LEVERAGED RESOURCES

PERFORMANCE OUTCOMES REPORTED TO U.S. DEPT. OF LABOR (SEPT. 30, 2017)

Performance Outcomes	Actual (9/30/17)	Overall Target	Goal Achieved
Unique Participants Served	1873	1801	104%
Participants Completing a TAACCCT-Funded Program of Study	796	1075	74%
Participants Still Retained in Their Programs of Study (or Other Grant-Funded Programs)	795	559	142%
Participants Completing Credit Hours	1133	1360	83%
Participants Earning Credentials	816	942	87%
Participants Enrolled in Further Education After Program of Study Completion and Exit	9	246	4%
Participants Employed One Quarter After Program of Study Completion and Exit	65	851	8%
Participants Retained in Employment Two Quarters After Program of Study Completion and Exit	25	740	3%
Participants Employed at Enrollment Who Receive a Wage Increase Post-Enrollment	560	384	146%

Incumbent Workers Receiving a Wage Increase

*US Department of Labor outcome definition, data lag within state reporting systems, and/or data sharing restrictions impact outcomes.

TAACCCT DATA: IT'S COMPLICATED

Why are there so few participants enrolled in further education after completion?

Currently, only program completers that leave their institution to pursue further education at another institution are considered. We have sought approval to count students that pursue further education within their institution.

Why do employment outcomes appear to be low?

US Department of Labor definitions under TAACCCT limit employment outcomes to those that were unemployed at enrollment. Only about 30% of Ohio TechNet participants were unemployed at enrollment. Further, for these eligible participants, employment is reported in the quarter after program completion and exit. When this restriction is imposed, only 14% of Ohio TechNet participants can currently be considered for employment outcomes – this is much lower than predicted. Finally, once eligible for employment tracking, data lags within state employment reporting systems impacts these figures.

Wages of participants are increasing!

An unexpectedly high proportion - nearly 70% - of Ohio TechNet participants were employed at enrollment, which can include any type of job whether in manufacturing or other full or part-time work. With that, we would expect to see a positive impact on wage earnings – and that's been the case. To date, 560 individuals have benefitted from a wage increase – 146% of our goal!

ADDITIONAL OUTCOME REPORTING OPTIONS

Data collected through the Ohio TechNet reporting procedure can provide additional detail on student performance. Select outcomes are listed below; note that these outcomes can only be calculated at a consortium-level.

Many listed outcomes are referenced on a technical assistance resource developed by the US Department of Labor that includes data that can be derived using Annual Performance Report outcomes: [What Can Your Annual Performance Report Tell You About Your Participants](#).

Employment and earnings trends are reflected on the Ohio TechNet Employment & Earnings Scorecard. Note that employment and earnings are defined differently on Employment & Earnings Scorecard compared to Annual Performance Report (reported to U.S. Department of Labor), as U.S. Department of Labor imposes restrictive employment and earning definitions.

PROGRAM-RELATED OUTCOMES REPORTED TO U.S. DEPT. OF LABOR (SEPT. 30, 2017):

- 47% of participants have completed a program.
- 42% of participants are currently retained in a TAACCCT program.
- 98% of completers earned a short-term certificate.
- 320 PLA credit have been earned by participants.

DEMOGRAPHICS REPORTED TO U.S. DEPT. OF LABOR (SEPT. 30, 2017):

- 69% of participants were employed at enrollment.
- Enrollment Status:** 35% full-time, 43% part-time.
- 5% of participants are eligible veterans.
- 3% of students have a disability
- 22% of students are Pell-grant eligible.
- 3% of students are registered as TAA-eligible.
- The average age of a participant is 29.
- Race :** 82% White, 11% Black, 2% More than 1 race, 2% Other.
- Gender :** 87% Male, 12% Female.
