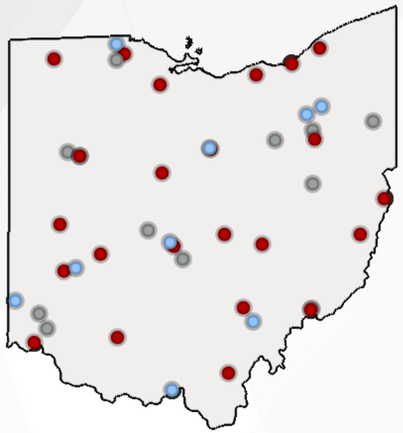
Date: December 16, 2025

OhioTechNet

Partners in Training Ohio's Manufacturing Workforce



OTN Members:

- Community College
- Technical Center
- University

Vision

The members of the Ohio Technical Skills Innovation Network, or Ohio TechNet, are nationally recognized for partnering with industry to implement collaborative, innovative solutions that meet manufacturing and tech workforce needs.

Mission

Ohio TechNet supports workforce development and academic professionals to incubate, develop and sustain programming that accelerates the growth of Ohio's manufacturing & technical workforce.

Purpose

Ohio TechNet partners benefit from peer-to-peer collaboration, technical assistance and access to resources, making program expansion and innovation at their institution more efficient, faster to implement and easier to sustain.

Strategic Focus Areas

Ohio TechNet's strategic focus areas provide partners with best practices, models, and technical assistance to address the critical workforce needs in the state.

- Guided Pathways for Youth
- Reaching New Audiences
- Innovative Earn and Learn
- Faculty and Educator Development
- Partnering with Industry

Technical Calculus for Engineering Technology

OhioTechNet

OACC OHIO ASSOCIATION OF COMMUNITY COLLEGES

Ohio Department of Higher Education

- Based on OSU's Technician Calculus course for BS in Engineering Technology (BSET), in partnership with ODHE and OACC - includes college and university faculty input
- Serves as a 3rd tier of technical math for programs in Advanced Manufacturing and Engineering Technology
- Learning Outcomes approved in August and added to the OT36: TMM 029 – Technical Calculus I
- Open Educational Resources (OERs) are being developed support adoption are being developed and will be made available early in 2026
- Technical Calculus II course outcomes and OERs will be developed in 2026

Memorandum

To: Provosts and Chief Academic Officers

CC: Mathematics Chairs/Leads

From: Dr. Ricardo Moena Faculty Lead, Ohio Transfer 36 Mathematics, Statistics, and Logic Review Panel/ Subgroup 2 of the Ohio Mathematics Initiative Chairs/Leads Network

Date: July 9, 2025

Subject: Announcement of Learning Outcomes for Ohio Transfer 36 Technical Calculus I (TMM029)

Background

The Ohio Transfer 36, Subgroup 2, Mathematics, Statistics, and Logic have been tasked with exploring the possibility of a Technical Calculus I course to assist with the alignment and acceleration of higher education efforts to meet defense industry STEM workforce needs, to expand and accelerate the K-12 manufacturing talent pipeline, and to equip more workers with the advanced skills and education required by Ohio's increasingly high-tech manufacturing environments through enrollment growth in engineering technician programs and expand STEM transfer pathways. The proposed course (TMM029) is intended as a mathematics option for students interested in majoring in an Advanced Manufacturing and Engineering Technology program.

In working with Mathematics faculty across the state, as well as workforce and industry representatives, the proposed Technical Calculus I (TMM029) serves the following purpose:

- Serves as a third tier of technical mathematics, an alternative to Calculus for programs in Advanced Manufacturing and Engineering Technology. The course incorporates topics useful in other courses in an Engineering technology degree, which are often omitted in standard calculus courses. For physics, these include vectors, parametrization, motion and connections to derivatives and integrals, projectile motion, circular motion, and harmonic motion. For other courses, these include the use of technology to compute best-fit curves for data sets, and to perform optimizations that would be difficult to do by hand.
- Acts as a course to improve completion and retention rate for pathways that are grounded in industry and workforce needs.

Industrial Training and Assessment Centers

CENTER SPOTLIGHT: LORAIN COUNTY CC ITAC

The Ohio TechNet **Industrial Training and Assessment Center (OTN ITAC)** hosted by Lorain County Community College (LCCC) is driving innovation and workforce growth in Ohio's manufacturing sector by partnering directly with local employers to align training with real-world needs. Through customized roadmapping for small- and medium-sized manufacturers (SMMs), expanded technical and career-readiness programs, and paid work-based learning opportunities, partners – including LCCC, Manufacturing Works and the Ohio Manufacturers' Association – are creating clear, accessible pathways into high-demand careers. But their impact goes beyond student success. Partners are forging strong, lasting partnerships with manufacturers that strengthen the regional workforce and fuel economic development. Looking ahead, they are working to scale the **WorkAdvance model** to reach more high school and adult learners, offering flexible credit and non-credit options tailored to flexible learning needs. By staying closely connected to industry through ongoing engagement and collaboration, partners continue to grow talent, support innovation, and shape the future of manufacturing in Northeast Ohio.

Lorain County Community College
OhioTechNet

WorkAdvance in Action: Opening Pathways to Manufacturing Careers

LCCC and Manufacturing Works are preparing to offer the WorkAdvance model to develop talent for Electricians, Manufacturing, and related pathways. WorkAdvance is a sector-based workforce development model designed to help individuals prepare for, enter, and advance in quality jobs within high-demand industries. It takes a dual-customer approach, serving both job seekers and employers, aligning training and support services with the needs of both. The team is completing the design of the program in fall 2025 and preparing for a full launch in the spring. Employers are stepping up to play an active role by engaging directly with students in classrooms, making sure their training reflects current industry needs, and considering students for internship and job opportunities. This expansion represents a pivotal moment for OTN ITAC partners, amplifying their collective reach and empowering more learners to launch successful careers in electrical fields and manufacturing.

ITAC Interns Step Into Industry

Another exciting development is the launch of the Ohio TechNet ITAC internship program. This summer, three students began an eight-week experience where they analyzed smart manufacturing roadmapping employer data, engaged with manufacturers, and completed a capstone project built around a mock company that served as a final roadmap report. The program gives students hands-on technical experience and strengthens employer partnerships. With support from statewide and regional partners, this internship model is setting the stage for more opportunities that connect classroom learning to the needs of Ohio's manufacturing sector.

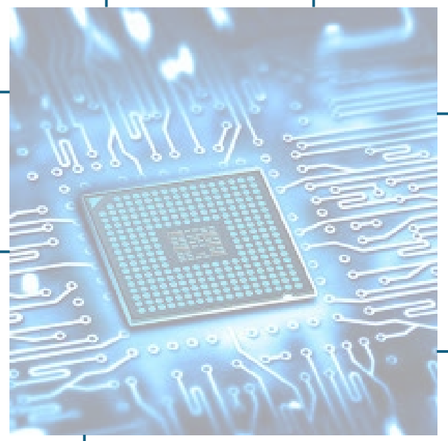
Curriculum Sharing Initiative

Supporting the creation of a **dynamic evaluation system that keeps our curriculum fresh, responsive, and cutting -edge**—powered by user feedback and the latest technological advancements to ensure excellence for years to come

Ensuring **curriculum materials are accessible to a wide audience** , ensuring learners everywhere can tap into high-quality resources and opportunities for growth!

Collaborating with industry leaders, academic institutions, and professional organizations to keep our curriculum cutting-edge, relevant, and future-ready—ensuring learners are prepared for the opportunities of tomorrow!



Conducting a **one-week MERIT (Manufacturing Electronics and Rework Institute for Training) workshop and bootcamp series** , focused on Design for Manufacturing.

Supporting the**alignment of curricular content with statewide initiatives** , including the work of the Ohio Manufacturers' Association in launching and managing the Ohio Manufacturing Competency Model—a game-changer for workforce excellence!

Assisting in **creating 200 cutting -edge MMEC Workforce Talent Development "Mobile Kits"** —bringing hands-on learning and career exploration directly to middle and high school students across the region. These kits will spark engagement, inspire future talent, and open doors to exciting opportunities in manufacturing and beyond!

Bringing together top subject matter experts to **curate world -class educational resources** —textbooks, research papers, lab manuals, and engaging multimedia content—ensuring learners have access to the very best tools for success!

High School Expansion & Credential Attainment (examples)

Midview High School (Grafton, OH)

- Year 1 (23/24): 7 New Students
- Year 2 (24/25): 43 New Students
- Year 3 (25/26): 17 New Students

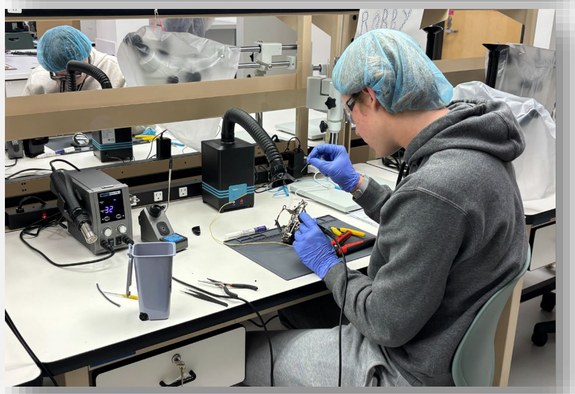
Students complete four (4) LCCC technical classes (2 Microelectronics and 2 Electrical); includes an industry recognized credential (IPC J-STD Soldering Certificate)
New in Fall 2025: Chromebook Repair Class

Seven (7) Midview High School students have been placed with MEMS employers for work-based learning credit

West Shore Career-Tech (Lakewood, OH)

*Includes 3 school districts

- Launched MEMS program in Fall 2025 with seven (10 students)
- Coursework can articulate into community colleges
- Engaged with local employers



Marion L. Steele High School (Amherst, OH)

- Spring 2024: 14 Students
- Fall 2024: 24 Students
- Fall 2025: 83 Students

High School teacher completed LCCC's Industry 4.0 Teacher Training in 2023, earning NOCTI certification in addition to FANUC and Rockwell Automation industry-recognized credentials . Students developindustry-validated skills and competencies and earn the FANUC Handling Too industry credential

Manufacturing Workforce Blueprint Launched!

OHIO'S MANUFACTURING TALENT PARTNERSHIP

The Ohio Manufacturers' Association

How Ohio will scale a dynamic manufacturing workforce that will evolve at the pace of innovation and **strengthen Ohio as a modern manufacturing powerhouse** across all industries.

01 Connect Ohio Manufacturing Workforce Systems and Priorities

Supporting and accelerating regional activation with statewide alignment on initiatives and processes

02 Grow Manufacturing Sector Career Awareness and Interest

Promote Ohio manufacturing careers and pathways with aligned, research-based messages and stories

03 Broaden the Manufacturing Workforce Talent Pool

Further expand opportunities for untapped talent to access Ohio manufacturing careers, with tailored programs and services

04 Align & Scale Manufacturing Education and Training

Create capacity, align and optimize programming, and drive completions of programs aligned to sector needs

05 Expand Innovative Earn and Learn

Explore new ways to create paid on-ramps and upskilling to manufacturing careers for Ohioans

02 Grow Manufacturing Sector Career Awareness and Interest	03 Broaden the Manufacturing Workforce Talent Pool	04 Align & Scale Manufacturing Education and Training	05 Expand Innovative Earn and Learn
